

MODIG FLEXIMILL

REDEFINING AFFORDABLE CUSTOMIZATION

COMPLEXITY SIMPLIFIED

FlexiMill is game changing technology with unparalleled uptime. This 6-axis machining center for aluminum and composite delivers enviable quality for a reasonable investment. It is based on a cast iron bed which makes the machine moveable and only requires a simple and inexpensive foundation. FlexiMill can be installed with an open machine cover or in a completely sealed machining area. Unparalleled milling capacity for large, complex components.

Modig means innovation. There is no room for compromise in quality at Modig.

EXCELS AT THESE PARTS:

- Lower/upper crown frames • Fuselage stringers • Wing box • Panels • Skins • Nacelle
- Alleron panels/structures • Winglets • Vertical/horizontal stabilizers
