LIVE THE FUTURE.

RIGHT NOW

The **CMS vm 30k** vertical CNC machining center is the perfect solution for **milling complex three-dimensional parts requiring precision, repeatability and an excellent surface finish with minimum cycle times!**

Its **accurate design** ensures that **first-class rigidity** is achieved, making the most of the range of operating units and electrospindles available.

The machine has been designed and produced with a **monobloc structure** to meet the demands of the aerospace, automotive, mould making and engineering industries, **guaranteeing heavy roughing, semi-finishing and finishing of small-large components in Steel, Aluminum and Composite Materials.**

KEY BUYER BENEFITS

Monobloc solution
table load **10000 kg/m²**

High geometrical
precision for **perfect
machining operation** and
high finishing quality

Nominal power **47 kW**
15.000 rpm
HSK A 100
